EXPERIENCE

PROJECT - CRM FARM SOFTWARE DEVELOPER

Foyer Technology Pvt Ltd | Chennai

2023 - PRESENT

CRMFARM is used by businesses to manage interactions and relationships with current and potential customers. CRM systems help businesses organize and centralize customer data, such as contact information, purchase history, preferences, and interactions. This information allows companies to better understand their customers, anticipate their needs, personalize interactions, and ultimately improve customer satisfaction and loyalty.

PROJECT - ERP SOFTWARE DEVELOPER

Foyer Technology Pvt Ltd | Chennai
2023 - 2024

ERP, or Enterprise Resource Planning, is used by organizations to manage and integrate the important parts of their businesses. An ERP software system can integrate planning, purchasing inventory, sales, finance, human resources, and more. ERP systems unify essential business processes into one complete system to streamline processes and information across the organization. The primary goal is to improve the efficiency of business processes and make the management of resources more effective.

SCOPE OF WORK :

- Developed and integrated responsive user interfaces (UIs) using MUI, React.js, Bootstrap, and Redux to ensure a seamless user experience across various devices and screen sizes.
- Implemented a cache system using React.js, significantly improved the overall performance of the project
- Collaborated closely with back-end teams to integrate APIs and services, ensuring efficient data flow and functionality across the ERP system.
- Improved system performance by 10% through efficient code compression and dynamic feature implementatio.

ADDITIONAL SKILL

- Analytical Thinking
- Problem Solving
- Quick Learner
